

Cares Program

Our mission is to develop superior genomic tests with the highest degree of accuracy and efficiency and where there is a clear patient need.

Our vision is to offer these best-in-class products to support public health and provide these products with unparalleled customer service.

The MPS2 algorithm has been developed to optimize accuracy for patients with an elevated PSA, and to meet our mission, we are taking an initial novel approach to partner with you and your patients.

Gain transformational risk assessment insights to guide clinical decisions and improve your patients' experience – with reimbursement concerns mitigated.

We are offering our next generation risk prediction test to your patients and guarantee that there is no billing at this time.

“ Your patients' health and peace of mind matter to us. ”

Have questions about our Cares Program? Please reach out to Client Services at (888) 978-8677, 8 a.m.- 8 p.m., Monday through Friday.
